Company Type

More than a quarter of our attendees are with Operator/Oil & Gas Companies

Job Type

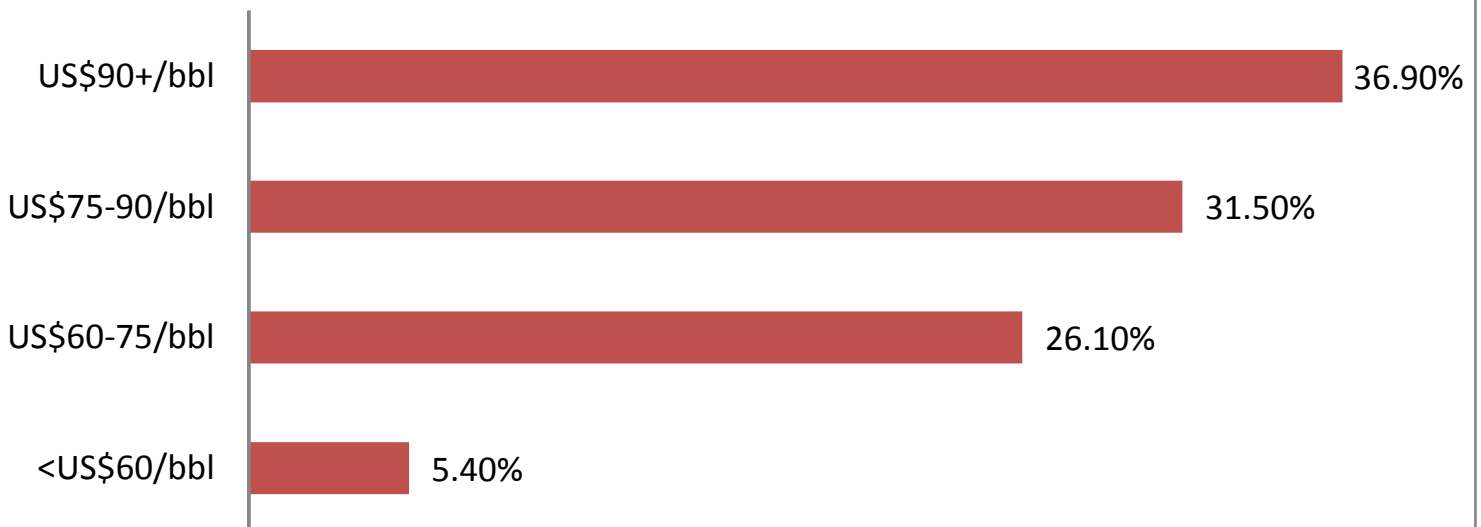

37% of our attendees are in a Management/CEO/President/VP Position

Technical Session Audience Response System Q&A

Courtesy of:

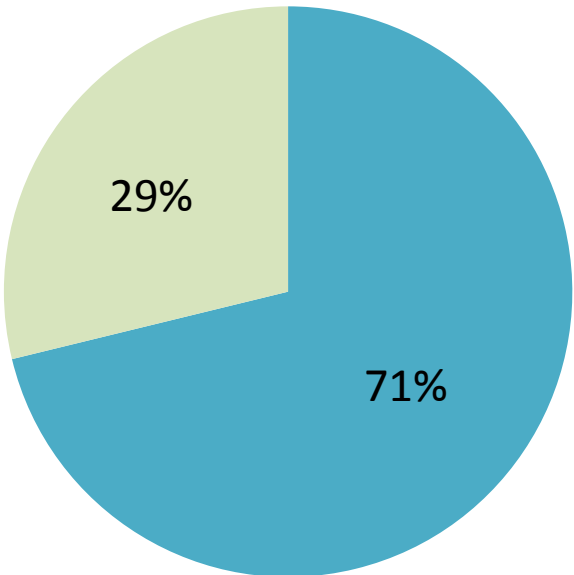

What Is the Current Threshold for Large Deepwater Projects?

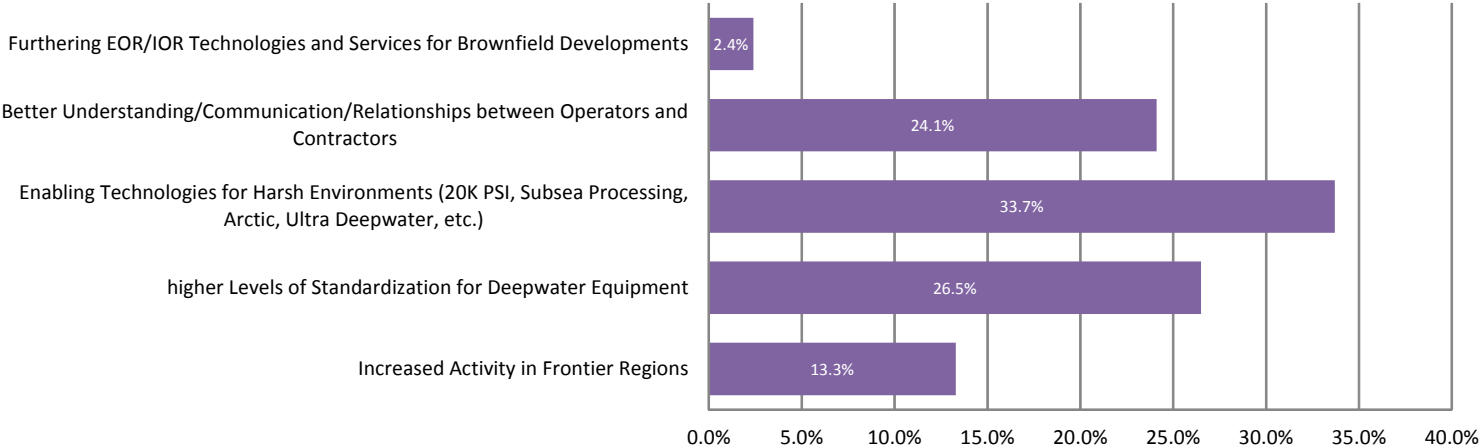

What aspects of the project could be considered as a major drawback for the project success?

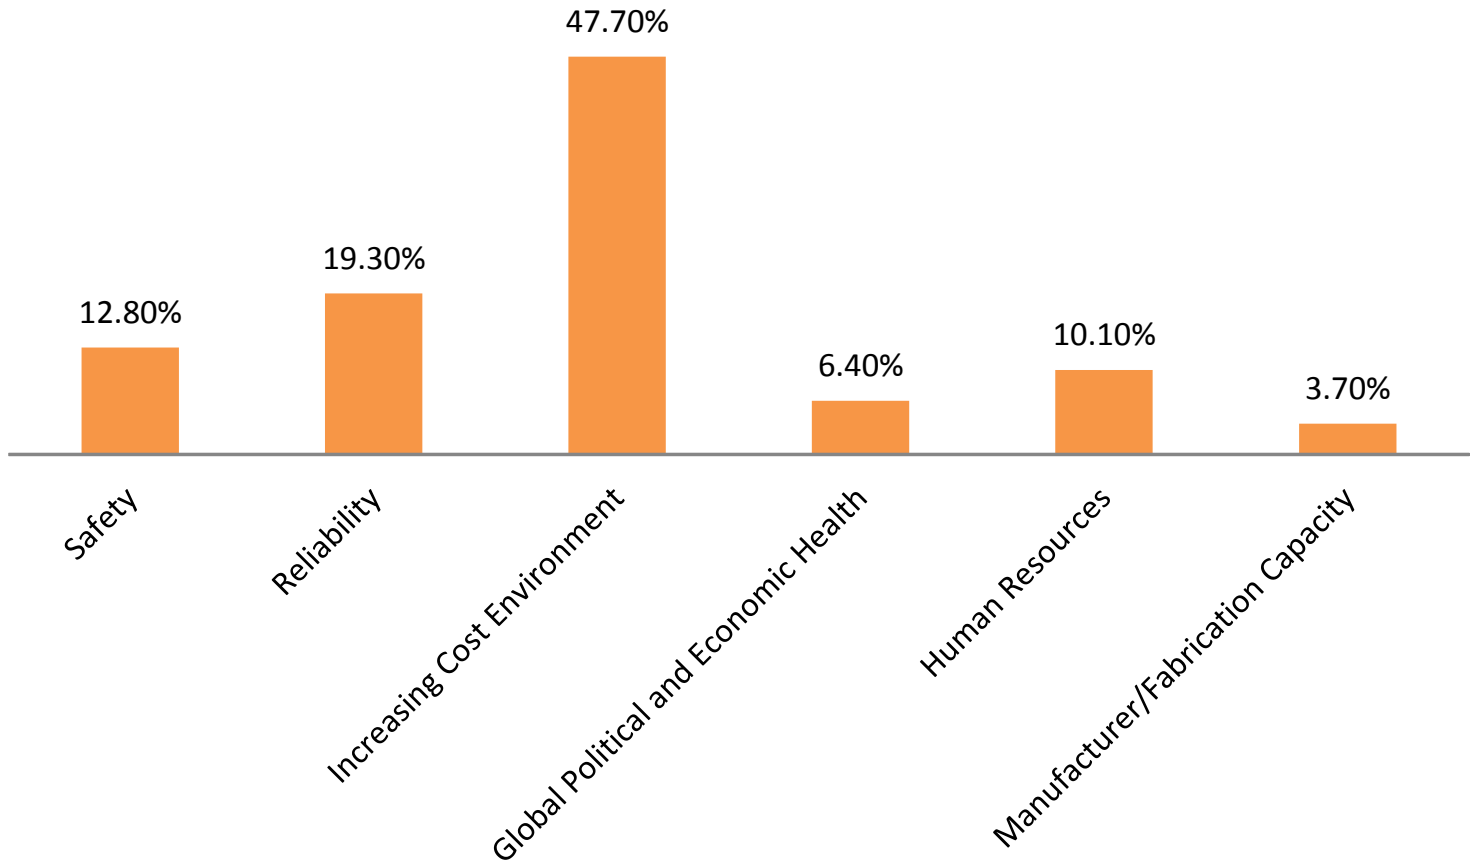

- Non-technical issues such as local content, gas commercialization, partners' agreement, competency in services, etc.
- Technical as maturity or availability of technology, qualification processes, etc.

What will have the most positive impact on future deepwater E&P activity?

In your opinion what will be the largest concerns for operators executing deepwater developments over the next few years?

Do you think that project development, as operator, is easier for an IOC in Brazil compared to other world locations?
