

Subsea Deepwater 101

- Introduction
 - Definitions - what is deepwater? (*Depth / Access / Shelf*)
 - Deepwater industries
 - Oil & Gas
 - Other players
- Oil & Gas
 - Hydrocarbons a bit of history (*how are hydrocarbons formed and locked in to reservoirs*)
 - How industry is commercially organised and financed
 - Key components
 - How we fit them together as a system
 - Operations
- Other players
 - Ocean sciences (*overview - weather, environmental etc*)
 - Mining (*drivers, what is the current technology status*)
- Activity (*Small team activity to develop a Deepwater field design*)
Execution
- Supporting technologies
 - Floating Structures and risers
 - ROVs
 - AUVs
 - Installation
- The Future
 - Oil and Gas
 - Renewables
 - Seabed mining
 - Legal (determining national boundaries)
- Closing
 - Summary
 - Q&A (maybe as a bit of a panel session)
