  - 2017: 26%
  - 2018: 30%

www.MCEDD.com
Gulf Quest are proud MCEDD has become the world’s premier, global deepwater event and the annual meeting place for strategic decision makers to actively address the most important issues of our industry and engage in critical dialogue addressing the future of deepwater.

Throughout MCEDD’s sixteen year history, our Operator-Sponsors have directly benefited from their active involvement including:

- Direct influence over the technical program agenda, highlighting their company’s strong commitment to deepwater, pertinent technical and commercial achievements plus the ability to bring larger company delegations to the event.

- Sponsor partners and Exhibitors continue to pay tribute to the benefits of their tangible involvement in the world’s premier, global deepwater event such as: profiling their company’s proven deepwater expertise, demonstrating their novel technology solutions to industry and shining a spotlight on their project successes.

- MCEDD’s venue continues to facilitate enhanced peer-to-peer networking amongst all attendees including sharing of project lessons’ learned, professional development and expanding tangible commercial contacts.

MCEDD actively maintains its ECE - Early Career Engineer program (inaugurated by Shell, BP and SUT) which continues to gain traction year over year. New for MCE-DD 2019 the SUT in conjunction with Quest will be offering a ‘subsea 101’ course aimed at anyone wanting to gain familiarly with the wide range of deepwater technology covered at the conference.

Our Advisory Board

The Advisory Board had its annual planning meeting at the Novotel London West Hotel on October 9, 2018 to gather and discuss the upcoming technical topics, directed content, evening events and more for the upcoming 2019 conference. Be sure to submit your abstract for review by our Advisory Board!

Letter from Our Chairman

As Lead Operator Sponsor, BP will be involved in key aspects of the 2019 event, with a keen focus on the technical program, as the recovery in global deepwater activity offers new opportunities all along the supply chain. The past few years have been challenging, but with efforts to control costs, along with more stabilized commodity prices, deepwater projects are becoming increasingly more attractive.

“BP is proud to support the 2019 MCEDD event and look forward to meeting with subsea market suppliers and operators. Our global projects organization see this as an important forum that will bring together key industry players to share lessons, opportunities and challenges we face in delivering competitive subsea developments. New and more efficient ways of working in the subsea industry will be essential to future success,” said David O’Connor, Head of Global Projects, BP.
